

Fender Flares for Yamaha YXZ 1000

ZP-YJ-031110-001

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

The Fender Flares are exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.

INSTALLATION INSTRUCTIONS

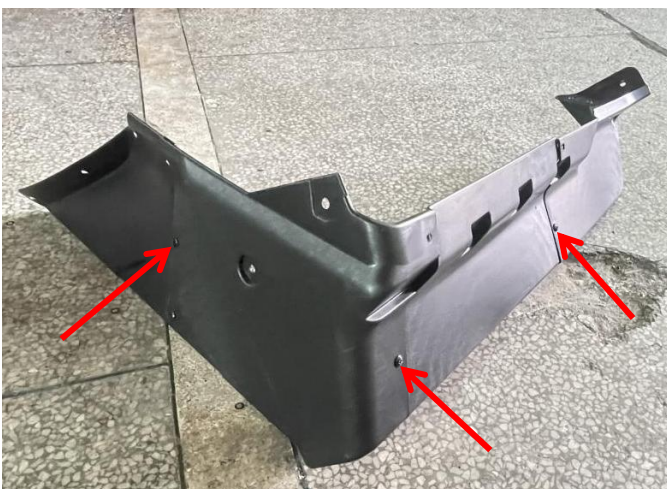

Note: Shift vehicle transmission into "PARK". Turn key to "OFF" position and remove from vehicle.

1. Product and accessories.

Installation steps for front fender flares:

2. Use the matching screws and nuts to assemble the split front fender flares into a whole. As shown below:

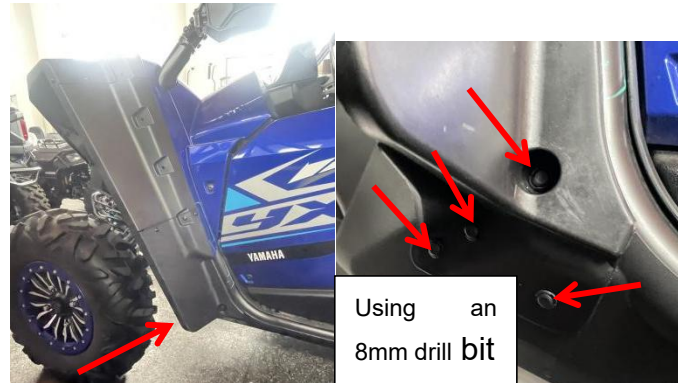

3. Unscrew the screws on the A-pillar trim panel of the original vehicle, place the fender flares at the installation position, and then screw back the original vehicle screws (if the original vehicle screws are not suitable for installation, they can be replaced with the matching screws of the product for installation). Then prepare a 6MM drill bit, drill fixing holes corresponding to the screw holes on the fender flares in sequence, and then fix them on the original vehicle with screws and nuts. As shown below:

Note: There are 5 fixed holes that need to be drilled with an 8mm drill bit and fixed with nylon fasteners.

Installation steps for rear fender flares:

4. Refer to step 2 and first assemble the split fender flares into a whole. As shown below:

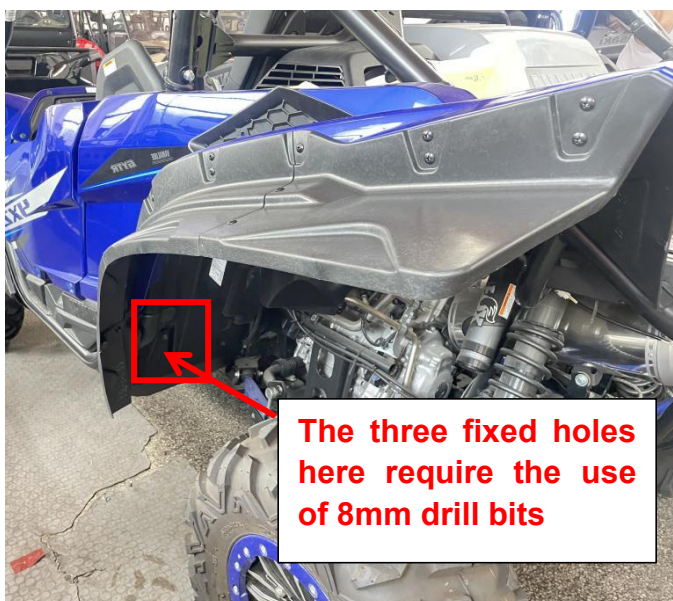

5. Refer to step 3 to place the fender flares in the original vehicle installation position, and then prepare a 6mm drill bit to drill fixing holes in sequence according to the screw holes on the wheel arch, and fix it with matching screws and nuts. As shown below:

Note: There are three fixed holes that require the use of an 8mm drill bit for drilling and the use of nylon fasteners for fixation.
