

# Tail lights For Yamaha RMAX 1000

ZP-YJ-031102-013

## BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

These Tail lights are exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.

## INSTALLATION INSTRUCTIONS

Note: Shift vehicle transmission into "PARK". Turn key to "OFF" position and remove from vehicle.

Product and accessories picture:

1. Open the door of the rear cargo box of the original vehicle, then remove the leaf plate of the rear wheel of the original vehicle, disconnect the wiring harness plug-in of the original taillight, unscrew the fixed screws, and remove the original taillight. As shown below:

2. Install a new taillight, fix it with the original vehicle screws, and then reconnect the overall harness with the taillight wiring harness. Then start the vehicle first, check whether the taillight works normally, and finally install the leaf plate back to its original position (the other taillight can be replaced and installed according to the above steps). As shown below:

3. Installation completed

**Note:** Please refer to the installation video in the Amazon listing before your installation, or contact the seller for the installation video.
