BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted. Please retain these installation instructions for future reference.

This *Sport Hood Scoop with LED Spotlight* is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris.

PRODUCT

INSTALLATION INSTRUCTIONS

1. Shift vehicle transmission into "PARK". Turn key to "OFF" position and remove from vehicle.
2. Remove the original front hood scoop of the vehicle first, and then move the hood clips to the new hood. As the picture shows:

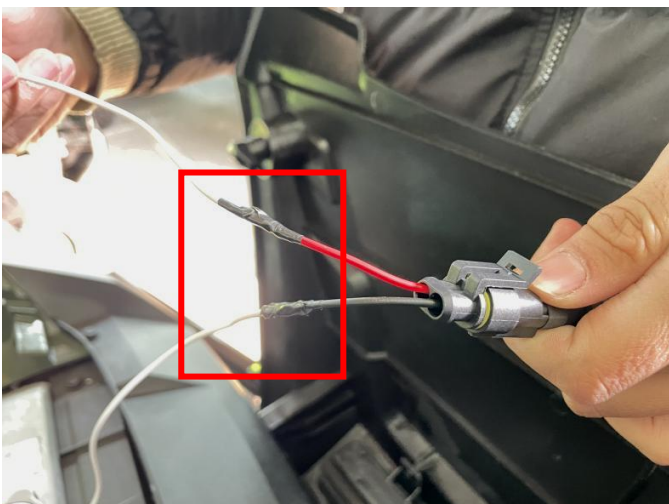

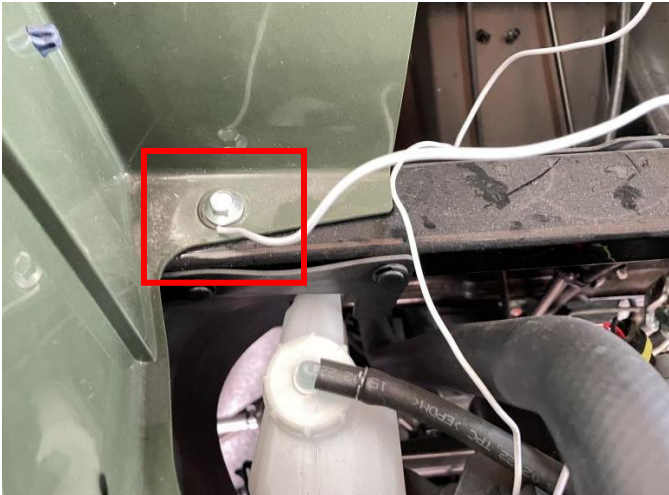

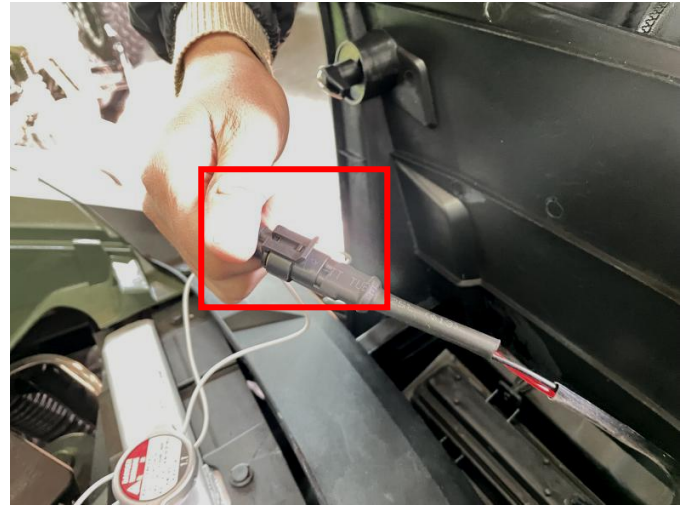

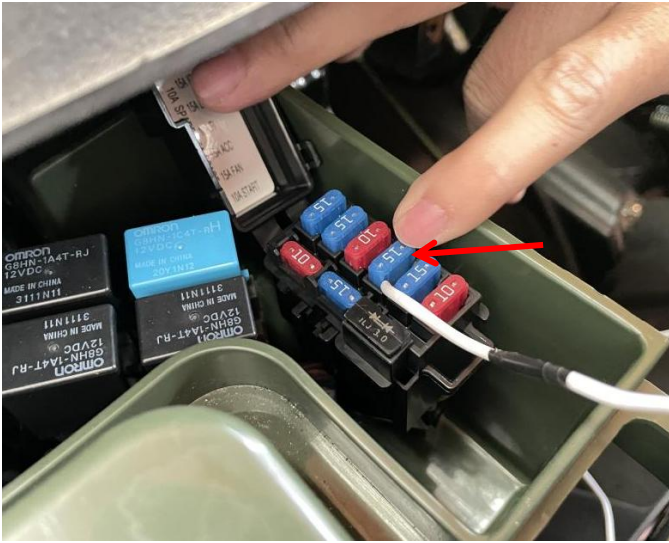

3. Take out the 2 extension cables in the accessories. One of which is connected to the vehicle's battery box. The other extension cable needs to find a nearby screw to connect to the frame. After that, disconnect the rear half of the plug-in of the spotlight wiring harness of the hood. Then connect it with the other end of the two extension cables and do insulation protection well (The extension cable connected to the frame is in black, and the other one in the electrical box is in red). As shown in the figure:

4. Connect the adapter plug-in to the spotlight wiring harness plug-in. Then put the hood scoop back onto the vehicle and fasten the hood clips. As the picture shows:

5. The installation is complete.
