Product picture and accessories

1. First assemble the mounting bracket of the side mirrors first. Don't tighten the screws when fixing them, facilitate the subsequent installation. As the picture shows:

2. Clamp the side mirror on the A-pillar frame of the original vehicle, adjust it to the appropriate height, and tighten the screws on the mounting bracket. Install the other side in the same way. As the picture shows:

**Note:** Before tightening the screws of mounting bracket, it is necessary to place two non-slip pads between the bracket and the rod tube.
